

Multi-liners are designed for use in Wastecare and Femcare Bins but also suit a range of commonly used bins such as kitchen cans, pedal bins and office waste baskets. Suitable for both commercial and domestic environments. Rest-assured, Multi-liners are made with the biodegradable additive TDPA® (Total Degradable Plastic Additive). TDPA® is sensitive to the exposure of raised temperatures, ultraviolet rays, and mechanical stress which prompts modified plastic to degrade quickly in a decomposable environment (such as landfill, compost, water or soil).

### FEATURES

- 50 liners per roll
- Comes in boxes of 6 rolls
- Environmentally Responsible
- Nonabsorbent and non-permeable
- TDPA® has non-toxic to sensitive plant or animal life.
- Designed and constructed to make use of maximum capacity
- Makes them ideal for food and beverage production sites.
- TDPA® is food contact compliant, non-absorbent and non-permeable

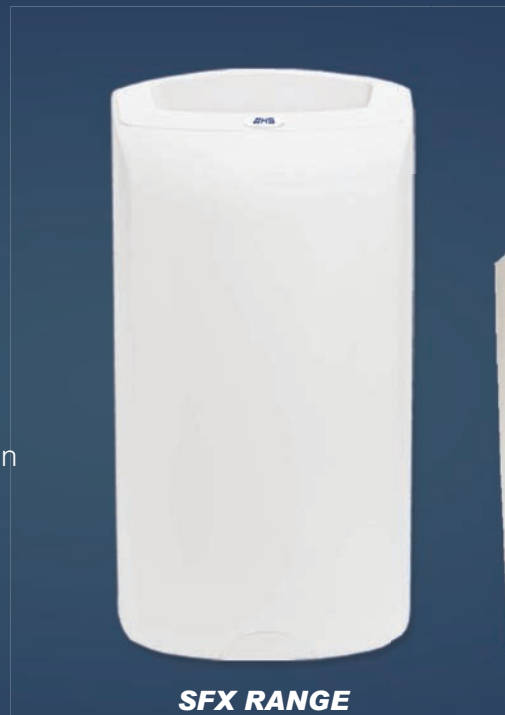

SC/19 Wastecare Liners

### LINER REFILLS

- 40 litre capacity
- 47.5 cm (wide) x 74cm (high)
- Made from TDPA® Polyethylene 20 microns

### DISPENSERS

- SW/20 Wastecare Paper Waste Bin
- SW/20PL Wastecare Paper Waste Bin
- SW/39 Excel Wastecare Bin large
- SW/13 Excel Wastecare Bin small
